Burntwood
Regional Health Authority

BRHA achieves Accreditation

The Accreditation Canada certificate presented to the Burntwood Regional Health Authority is proudly displayed by (right to left) Board Chair Lloyd Flett, Chief Executive Officer Gloria King, and Manager of Continuous Quality Improvement and Risk Management, Vivian Salmon.

The Burntwood Regional Health Authority achieved Accreditation for its health services and programs in 2010. Accreditation Canada surveyors used 1,963 criteria in evaluating the BRHA's programs and services during a site visit from April 26 to 30. These standards of excellence examine all aspects of the health care system from patient safety, ethics, staff training to partnerships with the community. The BRHA met over 90 percent of the criteria.

The BRHA is extremely proud of this accomplishment. Accreditation takes place every three years. The organization works continuously to meet the national standards in the health care services that are provided to patients, families and communities in the Burntwood Region.

This accomplishment is a credit to the hard work of all employees of the BRHA from the front line staff to Regional Management, Senior Executive, the CEO and Board of Directors.

For more information on the BRHA, please visit www.brha.mb.ca.
