Burntwood
Regional Health Authority

Items needed for H1N1 made more accessible at BRHA facilities

Infection control stands have been put in place at the entrance to each department in all BRHA facilities. These infection control stands have every thing that someone might need when dealing with a seasonal flu or H1N1.
There is a hand sanitizer dispenser, facial issue, gloves, and masks for both our adult and pediatric patients.

For more information on the BRHA, please visit www.brha.mb.ca.
